di San Paolo

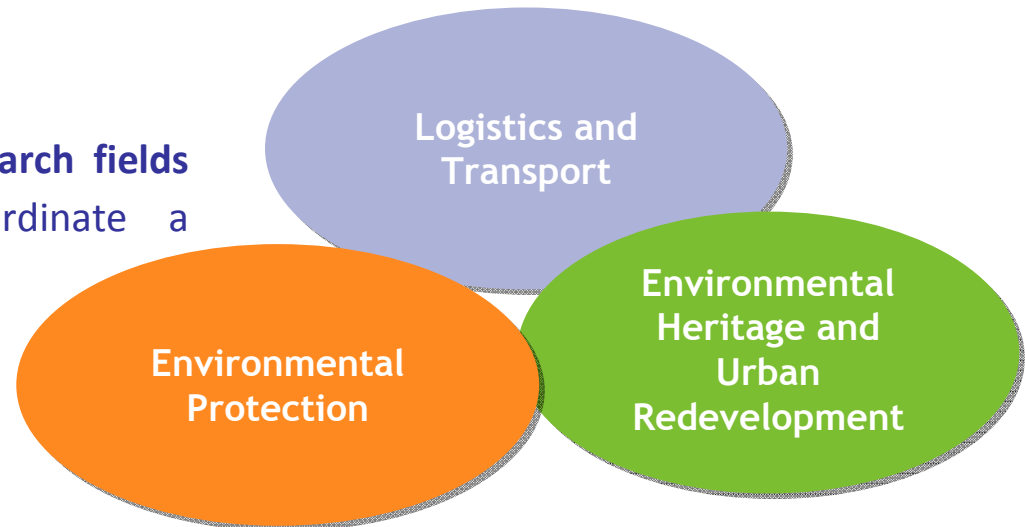

POLITECNICO
DI TORINO

SiTI – HIGHER INSTITUTE ON TERRITORIAL SYSTEMS FOR INNOVATION is a **non profit association** set up in September 2002 by the *Politecnico di Torino* and the *Compagnia di San Paolo* (Foundation of banking origin) to produce **research and training** oriented toward **innovation sustainability and socio-economic growth**.

SiTI is a permanent organization of the Compagnia di San Paolo, with a strong **interdisciplinary approach**, specifically devoted to territorial systems. It aims at solving complex problems through a multidisciplinary expertise.

Its activities are focused on three main research fields supervised by heads of Unit, who coordinate a multidisciplinary researchers team.

International Cooperation Unit

SiTI carries out projects funded by public and private institutions, both at **national and international level**. The International Cooperation Unit pursues the objective to **facilitate the participation of the Institute in applied research projects** within the wide framework of the intervention policies about territorial systems at European, national and local level.

Main activities

Urban and territorial planning

Environmental management: Environmental Impact Assessments (EIA) and Strategic Environmental Assessment (SEA)

Development of management and monitoring systems for the environmental and cultural heritage

Building of new scenarios for territorial transformations

Geo-visualization, geo-analysis, land planning

Drafting of Nomination Dossiers for new candidacies of UNESCO sites

Management plans for UNESCO World Heritage sites

Technical assistance to natural parks and protected areas for the achievement of UNESCO MAB (Man and the Biosphere Programme) label.
