SC5 - 7 – 2015

Biodiversity: Alien species risk and management assesment, impacts of alien species on ecosystem services, long-term ecological monitoring networks,

Land use changes: landscape structure and fragmentation, ecosystem services indicators, strategic territorial planning and consulting, landscape restoration

Forest ecology: natural regeneration patterns, and restoration practices after wildfires, forest inventory design, risk and impact studies in forest areas, environmental information systems (EIS)

Soil science: Fire effects on soils and restoration strategies, ecological restoration of quarries and mining activities

coordinator

SC5-10b – 2015

Experience in Biodiversity and Ecosystem Service of Green infrastructure (urban and peri-urban forest) in metropolitan areas: indicators, proxies, mapping, modeling and associated policy options. Complex databases available (species, indicators, cartography).

Barcelona as a case of study
