**Li**

**I come from a 3th generation of a family mining company PME having a "mining concession" of the Portuguese state.**

**We lived on supplying - "lepidolite pegmatite" for ceramic factories in Portugal.**

**Due to the crisis in ceramics and especially the ever increasing importance of lithium, it has to be valued.**

**We want to be part of a strong consortium of research concerning recovery of hard-rock  
**Lepidolite (Li)****

**No metallurgical research concerning hard-rock Lepidolite has ever been performed.**

**This research proposal requires:  
Laboratories with capacity for optimizing Lithium Processing**

[geologia.carolino@gmail.com](mailto:geologia.carolino@gmail.com)

**Li**

**This area was submitted to geological surveys with drilling up to 70m, financed by a Brit Euram program.**

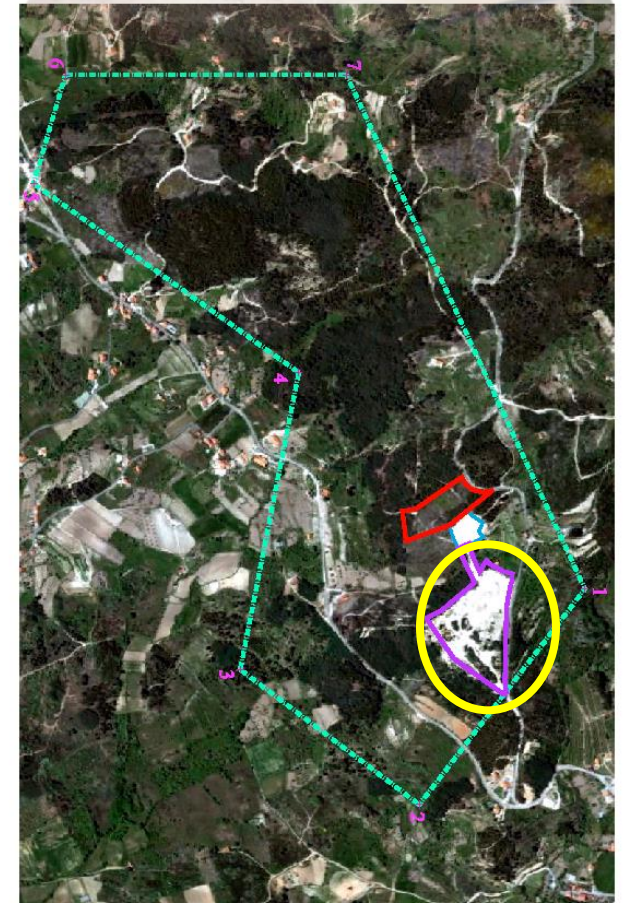

**Directorate General XII**

**Science, Research and Development  
Contract N° BRE2-CT93-0345**

**Eng.Doctor George Katalagarianakis**

Although Portugal is the 6th largest Lithium producer in the world, the potential is presently **underestimated**

because it is based on pegmatite utilization. The geology of our deposits evidences a potential that has not been yet thoroughly assessed.

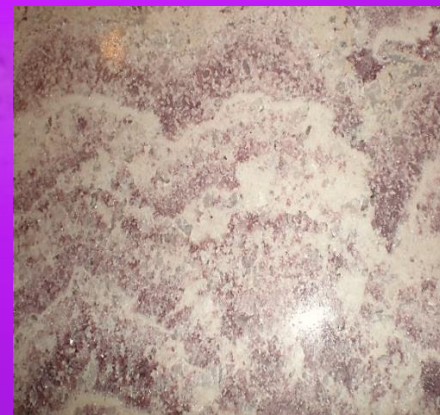

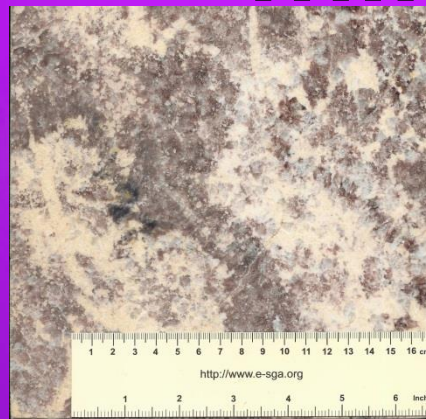

**We  
invite  
you to visit the  
mine**

35 work years  
in Pegmatites  
with Li

in Portugal.

Master degree in:  
Geomaterials  
and  
Geological  
Resources
