

Alma Mater Studiorum – University of Bologna

DA – Department of Architecture

Department of Architecture is a young department within the long history of Alma Mater Studiorum – University of Bologna. It has been build upon the previous Department of Architecture and Spatial Planning, having a strong tradition in urban and regional planning research.

The main focus of Department of Architecture research activities is the different scales of the built environment. Specifically it affects:

- ▶ sustainable design and planning at the urban scale-settlement analysis of urban systems;
- ▶ composition and architectural and urban design;
- ▶ technical architecture and analysis of building types;
- ▶ construction techniques, recovery and maintenance of building systems;
- ▶ history of architecture and urbanism.

UNIBO has a well-known experience in European project. In FP7, it has presented over 1100 projects, achieving total funding of about € 73 million for 228 projects, acting as coordinators in 44 of them.

H2020 WASTE-6b-2015 We4Cities project idea

We4Cities - Increase Waste Management Efficiency for Living Sustainable Cities

Main objectives:

- to promote eco-innovative waste management policies and projects that can foster the socio-ecological transition;
- to promote repair and reuse as a means of self-sustaining and ecological living;
- to foster community-based waste management initiatives involving recycling and organic composting, taking into account the gender dimension.

▶ Home and backyard composting, waste shopping, household items and WEEE

▶ Emphasis on waste management at households-community level in urban areas

Coordinator: Alma Mater Studiorum – University of Bologna, Department of Architecture
