

# HORIZON 2020 InfoDay Societal Challenge

## VILOGIA looking for partners in WASTE 6b call

## VILOGIA

- Vilogia is a private real estate group of social housing with over 56 000 housing unites in France.
- We are the 3rd big social housing company in France with competences in renting, construction developing and planning.
- With our large national implementation in divers French cities like: Lille, Nantes, Lyon, Bordeaux, Marseille and Paris, and diversity of our housing stock we are constantly looking for innovative, construction techniques, social approaches, development solutions in order to make our tenants life better.
- Vilogia is involved in several European projects and preparing some new ones. We are constantly looking for new valuable partnerships or interesting, innovative calls to participate.**

## WAIST 6b call proposal

- Bulk items collection, door to door, provided by public service is doomed to disappear in the nearest future in France. But what is going to happen with bulky waists that tenants constantly store in shared spaces of our buildings or just in front of them thus increasing the risk of fire, diseases, provoking disorder on our sites?
- Vilogia want to test innovative solutions to deal with this problem such as a mobile waste service for example. How does it work: one day a month, residents can drop off their bulky waste in recycling affected bins. Those ones are sent to recycling plants or any other approved treatment places.
- Vilogia tries also to develop a recycling system on site and attract tenants to involve in the process in order to give some left over objects second life, create new jobs, engage schools or district social centres in concerned areas.
- **We have a lot of practice, return on experience and good ideas. We are looking for serious partners to tackle this issue together. It's a problem touching every Social Housing company across Europe and a challenge to achieve.**
