

## The North Baltic Water District

- County borders
- Lake Mälaren and Hjälmaren catchment area

# Lake Mälaren!

- Third largest lake in Sweden, 7th in Europe
- 2,5 million citizens drink its water
- Expanding cities in the region and capital area
- Need of climate adaption, reduction of contaminants and attractive cities

Two Swedish public and private cluster organisations (NGOs) are looking for partners and participation!

# To do

Demonstration and pilots of resilient, sustainable and multifunctional storm water management solutions, making the Mälars Region (and partner locations in Europe) a joint testbed for innovative water solutions, eco-system services and climate adaption

# Topic

- Coordinate (or participate) in topic **Water-1-Bridging the gap, from innovative water solutions to market replication, scope b [2015]**
- Reference to EIP on Water: Flood and drought risk management, the role of eco-system services in the provision of water related services, water governance, decision support systems and monitoring
- Possible relation to LIFE IP and European Development Fund projects
